## iLevel Setup

- Attach the AC adapter to the iLevel DC input jack then plug the AC adapter into the wall.
- Open the network list on your PC, cell phone, or tablet and connect to the network "iLevelNet"\*.

\*Please complete this step within 5 minutes of plugging into a wall outlet.

Open a browser and navigate to <u>http://setup.com</u>. You will see this page:

• Once the networks appear, select your access point name.\*

## **Frequently Asked Questions:**

Q. The iLevelNet network was there but, disappeared before I finished the setup?

A. The device will stay on the network list for only 5 minutes. Unplug the device and plug back in after a 10 second wait. You will then see the network on the list and, can proceed with your setup.

Q. I am unable to get the network signal nearby my tank. What can I do?

A. Try moving your router closer to the tank area. If that does not work, you can use a Wi-Fi extender/repeater to extend the Wi-Fi signal.
